SUMMARY

Web Developer with 8+ years of experience specializing in CMS-based development including WordPress, Shopify, and Prestashop. Experienced in building, optimizing, and maintaining over 50 websites with a strong focus on performance, scalability, and SEO best practices. Strong background in front-end and back-end development. Committed to delivering reliable, secure, and high-performance web solutions for businesses in Indonesia and international remote environments.

WORK EXPERIENCE

Web Developer & Technical Support, eFusion Technology Pte Ltd (Singapore) Nov 2025 - May 2026

- Develop, maintain, and optimize CMS-based websites (WordPress, WooCommerce, Shopify, Prestashop, Divi).
- Monitor and manage technical support emails and helpdesk tickets with structured, solution-oriented responses.
- Diagnose and troubleshoot website errors, performance issues, and plugin conflicts.
- Research and evaluate third-party plugins and tools based on technical feasibility and project requirements.
- Create and manage staging environments to ensure safe testing and controlled deployment processes.
- Test themes, plugins, and system updates prior to implementation on live production environments.
- Document troubleshooting procedures, technical workflows, and resolution logs for knowledge management.
- Collaborate with developers and project managers to escalate and resolve high-complexity technical issues.
- Maintain effective written communication with clients to ensure clarity, transparency, and service quality.
- Manage multiple concurrent tasks while meeting deadlines in a fast-paced remote setting.

Web Developer, Suba Arch Studio Jun 2021 - Aug 2025

- Design and develop responsive, user-friendly websites using HTML, CSS, JavaScript, and Wordpress CMS.
- Build dynamic web applications using PHP and MySQL for back-end functionality.
- Develop and customize WordPress themes and plugins based on project requirements.
- Optimize website performance, including speed, structure, and technical SEO implementation.
- Ensure cross-browser compatibility and mobile responsiveness across all devices.
- Implement SEO best practices, including clean URL structures, metadata optimization, and schema integration.
- Troubleshoot and resolve bugs, performance issues, and compatibility conflicts.
- Maintain and update existing websites to ensure security, stability, and scalability.
- Collaborate with designers and stakeholders to translate business requirements into technical solutions.

Web Development Teacher, Ibaadurrahman Vocational High School**Jul 2019 - May 2021**

- Design and develop structured lesson plans and curriculum for website development courses.
- Teach front-end technologies including HTML, CSS, and JavaScript with practical implementation.
- Guide students through project-based learning to strengthen applied technical skills.
- Explain core web design principles, responsive design techniques, and usability standards.
- Introduce accessibility best practices and foundational web performance concepts.
- Assess student performance through assignments, projects, and evaluations.
- Provide individualized feedback to improve coding logic and technical understanding.
- Mentor students in troubleshooting and debugging common development issues.
- Stay updated with current web development trends to maintain curriculum relevance.
- Foster analytical thinking and professional coding discipline in classroom environments.

Information Technology Teacher, Annaba Junior High School**Jul 2016 - Jun 2019**

- Design and implement structured lesson plans covering computer systems, networking, programming, and software applications.
- Deliver both theoretical instruction and practical lab-based training.
- Teach fundamental concepts of hardware, operating systems, and network infrastructure.
- Introduce programming logic and basic coding principles.
- Guide students in applying IT solutions to real-world case scenarios.
- Assess student performance through exams, projects, and practical evaluations.
- Provide constructive feedback to strengthen technical understanding and skill development.
- Update curriculum content to reflect current technological trends and industry standards.
- Mentor students in troubleshooting methodologies and systematic problem-solving.
- Foster professional ethics and digital responsibility in IT practices.
